

A film coating  
that really masks  
bad odor?  
Why not!

Seals the unpleasant smell of  
active ingredients, an easy-to-use  
film coating compound.

## General Information on BIOGRUND

Since 1999, **BIOGRUND** has been the specialist for the homogeneous mixing of excipients and carriers. With locations in Germany, Switzerland, America and Russia, we support the food supplement and pharmaceutical industry in the development, formulation and production of solid oral dosage forms. The tailor-made and ready-to-use special powder mixtures for film coating, sugar-coating, coloring and tableting enable optimum results in a short time. Easy, fast and reliable!

## Product Information AquaPolish® OM

**BIOGRUND's** one-step film coating system **AquaPolish® OM** perfectly masks bad and strong smelling actives (e. g. herbal extracts). Sealing these characteristics by using **AquaPolish® OM** enables a pleasant application for the consumer and increases patient compliance. It provides a protective and economical coating on tablets, pellets, granules and capsules without influencing the disintegration time.

The product ingredients are a combination of HPMC, HPC and other cellulose ethers with odor masking additives. Due to the further additives which form a hardly soluble film, an odor-masking is achieved. It is also recommended for solid dosage forms where a combination of odor and taste masking is required.

Our compound is a homogenous, dry-milled powder developed for the coating of all kinds of solid dosage forms. It is easy to suspend and a reproducible high-quality film coating can be guaranteed. Clear, white and colored preparations can be tailor-made according to customer requirements.

**AquaPolish® OM** can be applied by using conventional or modern coating equipment.

Regulatory and quality aspects: All **AquaPolish® OM** formulations are developed to meet the official regulatory requirements of the user's country for pharmaceutical products and for nutritional or dietary supplements.
