

Pearlescent  
solid-colored  
tablets?  
Why not!

High aesthetic value,  
simplified coloring of  
tablets, pellets, granules.

## General Information on BIOGRUND

Since 1999, **BIOGRUND** has been the specialist for the homogeneous mixing of excipients and carriers. With locations in Germany, Switzerland, America and Russia, we support the food supplement and pharmaceutical industry in the development, formulation and production of solid oral dosage forms. The tailor-made and ready-to-use special powder mixtures for film coating, sugar-coating, coloring and tableting enable optimum results in a short time. Easy, fast and reliable!

## Product Information TopMill® G

**BIOGRUND's** ready-to-use coloring agent **TopMill® G** provides a homogeneous solid-colored product. It is a unique, dry milled, homogeneous blend of **Candurin®** pearl effect colors with additional excipients. The widely approved mineral colors are based on natural silicate combined with titanium dioxide and/or iron oxide and give your tablets a brilliant and unique appearance.

**TopMill® G** is a ready-to-use master batch, developed for the coloring of all kinds of solid dosage forms. It is easy to suspend and a reproducible high-quality color can be guaranteed, which has been proved at Budenheim's Tableting Competence Center (TCC).

A unique and exquisite range of **Candurin®** is available – from silver and gold, or interference up to iron oxide shades of red and bronze.

Due to its excellent compatibility with other colors, tailor-made solutions can be offered – an unmistakable appearance for your products!

Regulatory and quality aspects: All **TopMill® G** formulations are developed to meet the official regulatory requirements of the user's country for pharmaceutical products and for nutritional or dietary supplements.
